## Fourth Grade

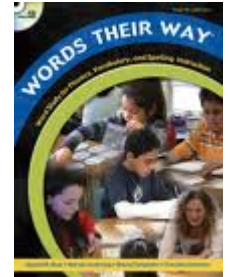

### Learning Experiences

Welcome to the fourth grade class of Mr. Davis! This is my first year at Gill Elementary School. I have taught fourth and fifth grade at Flanders and Forest Elementary Schools over the past several years. Some rewarding experiences that your child can look forward to in the fourth grade this year include: leadership opportunities in the LOC Credit Union, safety patrol, student council, peer mediation, and the LINKS program. We have a new math program called Bridges Math. We are excited to be learning hands-on strategies for solving math problems! We will be using the Words Their Way series to learn spelling and word usage strategies. Social Studies features various aspects of Michigan and U.S. history, geography, economics, government, and the Core Democratic Values. We will use the hands-on Foss Kits to learn our science lessons. We will be mastering many different reading and writing strategies during reading and writing workshop. We will strive each day to be great learners. It is going to be a great year here in Room 5E!
