

Medical Skills Field Study is a class in which students have an opportunity to investigate different health care occupations. Students will be able to go to a local health care facility and shadow different health care providers. Medical Skills Field Study needs to be taken concurrently with Medical Terminology in order for students to have enough time to go to a health care facility. Students are responsible for their own transportation. Students are required to get a TB test. An instructor is present with the students at the health care facility.

Students wishing to enroll in Medical Skills Field Study are required to obtain 3 teacher recommendations. The teacher recommendation sheets need to be returned to Mrs. Donato, not given back to the student.
